Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-37, drawn to a container, classified in class 220, subclass 785.
 - II. Claims 38-44, drawn to a process of making the container, classified in class 29, subclass 428.
2. Inventions of Group II and Group I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make another and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the containers can be made using rectangular frames made from a material other than metal such as plastic.
3. Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.
4. This application contains claims directed to the following patentably distinct species:
 - 1) Figures 3 and 3a,
 - 2) Figures 3 and 3b,
 - 3) Figures 3c and 3a,
 - 4) Figures 3c and 3b,
 - 5) Figures 4 and 3a,
 - 6) Figures 4 and 3b,
 - 7) Figures 6 and 3a,
 - 8) Figures 6 and 3b.
5. The species are independent or distinct because of structural differences between species.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim appears generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

This restriction is being done by correspondence because of the number of species involved and the need to make an election between the inventions of Group I and Group II as well as an election of species. An election of species is required in the election of either Group Group II or Group II.
